

MonoBehaviour

```
classDiagram
    class MonoBehaviour
    class ItemTooltip {
        + Snap()
        + Reset()
        + UpdateTooltip()
    }
    ItemTooltip --|> MonoBehaviour
```

The diagram illustrates a class hierarchy. At the top is the 'MonoBehaviour' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it is the 'ItemTooltip' class, also a rectangle with three horizontal compartments. The top compartment contains the class name, the middle compartment is empty, and the bottom compartment lists three methods: '+ Snap()', '+ Reset()', and '+ UpdateTooltip()'. A blue line with an open triangular arrowhead points from the 'ItemTooltip' class up to the 'MonoBehaviour' class, indicating that 'ItemTooltip' inherits from 'MonoBehaviour'.

ItemTooltip

+ Snap()
+ Reset()
+ UpdateTooltip()
